AI Product Manager · GenAI & Agentic AI · Data Products · 12+ Years' Experience

PROFESSIONAL SUMMARY

AI Product Manager with 12+ years leading data and AI products from concept to scale. Deep hands-on expertise in Agentic AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and ML-powered platforms. Proven track record shipping high-impact AI solutions— including an LLM-powered RAG solution that improved support query accuracy from 70% to 85%, a commerce analytics product driving ~\$50M in incremental billings, and an enterprise Agentic AI support platform progressing through enterprise rollout. Equally fluent in product strategy, stakeholder alignment, and hands-on technical execution across Agile teams.

EXPERIENCE

Deloitte Consulting | Technical Product Manager

Client: Leading PC Manufacturing Company

Jan 2025 – Present

Technical Product Manager – Agentic AI & GenAI Platforms

- Owned end-to-end product strategy for an Agentic AI customer support platform built on LLMs, RAG pipelines, and multi-agent orchestration (8+ specialized agents) advancing through phased enterprise rollout following successful pilot with 100 customer support representative
- Improved support query accuracy from 70% → 85% by designing an LLM-powered knowledge graph and RAG system enabling intelligent, contextual troubleshooting responses scaling from a 50-rep pilot to 20,000+ agents across 15 countries
- Drove ~20% automation of inbound support tickets and cut average resolution time by 20% for one issue type, directly improving CSAT and operational efficiency at enterprise scale
- Defined AI product roadmap, evaluation framework, and KPIs—including intent accuracy, resolution success rate, response latency, and human escalation rate—to govern multi-agent performance
- Partnered with AI engineers, architects, and data scientists to design agent orchestration workflows, tool integrations, and scalable microservices for production deployment

Client: Global Networking & Technology Company

Jan 2025 – Apr 2025

Technical Program Manager – Generative AI Solutions

- Delivered a GenAI reverse-logistics solution that reduced human evaluation effort by 30% and accelerated resolution cycles, applying Agile delivery with continuous stakeholder feedback loops
- Led end-to-end AI program lifecycle—requirements gathering, sprint planning, cross-functional coordination—ensuring on-time delivery of a scalable, production-ready solution

Client: Global Consumer Technology Company

Jul 2020 – Dec 2024

Data Product Manager – Wallet, Payments & Commerce Analytics

- Built and launched a commerce analytics data product that generated ~\$50M in incremental billings by identifying customer drop-off and friction points across 1B+ transactions for ~300M customers
- Managed end-to-end data product lifecycle across 7 lines of business, delivering funnel analysis dashboards and trend insights that directly informed platform optimization decisions
- Spearheaded GDPR and DMA compliance program, quantifying privacy trade-offs (e.g., composite key replacement) with <1% insight degradation—enabling legal approval without sacrificing analytical value
- Reduced data system discrepancies from 50% to 2% by redesigning validation processes and launching anomaly detection and alerting frameworks across production data pipelines
- Created PRD, defined 30+ performance metrics, and led customer discovery interviews to shape AI-ready product strategy for Agile MVP development

Client Projects (Multiple Industries)

Feb 2019 – Jun 2020

Data Scientist

- Built ML-driven funnel analytics pipelines over 500B+ raw clickstream records, surfacing key customer drop-off points for product and data science teams

- Developed retail sales forecasting model that generated \$1M in quarterly savings; replaced legacy model with improved accuracy and actionable recommendations
- Delivered customer segmentation, churn prediction, revenue forecasting, and anomaly detection models across finance, retail, and payments verticals

Schneider Electric | Senior Applications Consultant

May 2015 – Sep 2016

- Implemented Oracle Transportation Management (OTM) across 7 manufacturing plants in China, standardizing routing, tracking, and cost optimization for multi-plant supply chains
- Performed route optimization across 7 logistics service providers, achieving \$10,000/month in cost savings

Infosys Ltd | Senior Systems Engineer (Data Analyst)

Mar 2010 – May 2013

- Optimized SQL queries against Oracle Financials data, reducing a critical report's processing time from 24 hours to 30 minutes (98% improvement); designed Oracle BI dashboards for stakeholder reporting

CORE SKILLS

AI & GenAI	Agentic AI · LLMs · RAG · Prompt Engineering · Knowledge Graphs · AI Agents · LLM Evaluation · LangChain · Pinecone · Vector Databases · AWS Bedrock · GCP Vertex AI · AgentSpace
Product Mgmt	AI Product Roadmaps · PRD · Agile/Scrum · Kanban · A/B Testing · KPIs & Metrics · Customer Discovery · Cross-functional Leadership · Jira · Miro · Wrike
ML & Data	Supervised/Unsupervised Learning · Python · PySpark · SQL · Tableau · TensorFlow · PyTorch · Scikit-learn · XGBoost · Splunk · Trino · Teradata

EDUCATION

Carnegie Mellon University, Heinz College

Aug 2017 – Dec 2018

Master of Information Systems Management – Business Intelligence & Data Analytics | GPA: 3.76 / 4.3

Indian Institute of Management (IIM), Mumbai

Jun 2013 – Mar 2015

Master of Business Administration | GPA: 3.95 / 4.0

Bhilai Institute of Technology

Jul 2005 – May 2009

Bachelor of Computer Science | GPA: 3.84 / 4.0
